RAG Q & A Agent — Streamlit Demo

Ask a question related to the knowledge base

Your Question:

What is renewable energy

Ask

AI Answer

Renewable energy refers to energy sources that are naturally replenished over time and are not depleted when used, such as wind, solar, hydro, and biomass energy.

biomarker data may affect trial outcomes [28]. Some of the applications of AI in renewable energy with AI apps are shown in Figure 1.1. 5Artificial Intelligence 1.4 APPLICATIONS OF AI IN WIND RENEWABLE ENERGY SYSTEMS Fossil fuel consumption all over the world is increasing day by day; therefore, the need for electric energy is also increasing. Effective ways of electric power genera - tion are inherently dependent on the world economy. One of the sources for sub - stitute renewable energy is win...
